Chronic Liver Disease and Cirrhosis: ICD-10 codes K70, K73-K74 as underlying cause of death

Source: California Department of Public Health, Center for Health Statistics, Office of Health Information and Research, Death Statistical Master Files; SANDAG January 1 population estimates (2001-09 estimates released 2010)

^{*} Rate not calculated for fewer than 20 deaths in this category.

^a All rates are per 100,000 population. Rates may vary slightly from previously published data due to updated population estimates.

^b Adjusted rates are adjusted to 2000 U.S. Standard Population.

c Deaths with unknown age, region or race/ethnicity are reflected in the county total, but not in the individual categories. Category sums may not add up to county total.

^d Race/ethnicity data may be different from previously published data due to reporting modifications.
